

Kinder Ground

2025

Do-Gooder Report

Growing
Compassion
Together

2025 BY THE NUMBERS

\$114K

in donations, ticket sales and in-kind support received

\$100K

promised in 6 grants awarded and 4 projects supported

229,850

animals given better care, comfort and handling

Kinder Ground creates lasting change for farmed animals by acting as a **Catalyst** for change on farm, **Celebrating** compassion in the community, and by **Cultivating** kindness through training and education. After 2 full years, Kinder Ground has distributed **\$261,738** in support of projects and programs.

How have our seeds of compassion grown?

Kinder Ground as a Catalyst

180,000+

farm animals given extra care and comfort

19 Projects & Pilots

\$5,200 average grant

Celebrating Success

300

farmers sharing ideas and building community, making compassion contagious

\$19

average cost per person

Cultivating Kindness

1100+

students & care givers trained

5

Kinder Hoof Care Academy Trainings

255K +

cows with better hoof care year after year

Making the most of your gift

\$0.51

The change we create sustains year after year. On average it takes just 51 cents per animal to make things a little better.

11%
% of total spend on operating expenses

100%
% of on-line donations spent on projects

WHAT'S BEHIND THE NUMBERS?

Transparency Matters

At Kinder Ground we recognize that not everything that counts can be counted. Changing hearts and minds and creating a habit of compassion is where lasting change is made. Still, we do our best to track progress and share it with you.

Brushes & Jackets - We figure each jacket and brush will last 5 years. Of course, this depends on use and care.

Grants Promised

Results include projects approved and started by December 2025. Dollars spent include the total for completed projects, or the amount promised for projects still in progress. Numbers will be revised if needed when projects are complete.

Animal Lives Made Better

KHCA calculations are based on the number of animals each trimmer estimates that they trim each year.

Farm & Pilot Project calculations use the number of animals on the farm that benefit from the improvement multiplied by the number of years we expect the improvement to last.

Stockmanship Training and Student Education tracks the number of people trained. We do not attempt to estimate the number of animals that will be impacted.

Spin & Trim chute, and panels for low stress handling

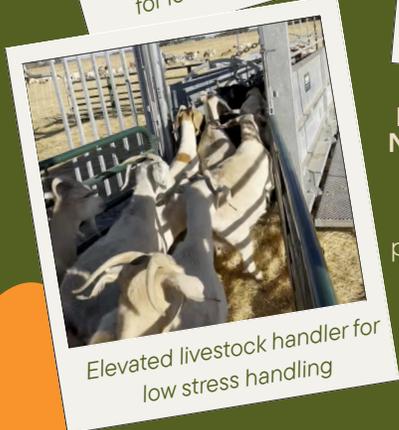

Improved housing and feeding for calves

The Cost of Doing Better

Figures include dollars given or spent by Kinder Ground and a percentage of operating costs apportioned to each project. It does not include in-kind, matched funds and grantee funds provided to support the project.

Operating expenses exclude expenses that were not captured in the start-up period, paid out of pocket by founders, and the 1-time expense of the website development (\$25k).

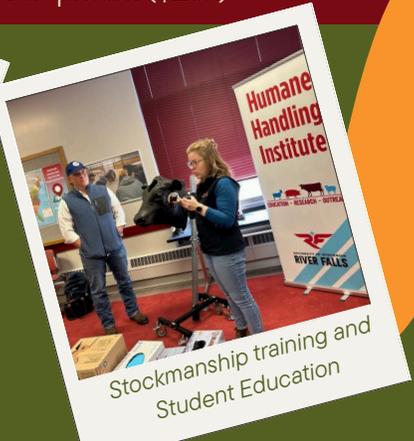

Elevated livestock handler for low stress handling

Infrastructure and New Methods - We estimate that equipment and adoption of new practices will last 15 years.

Providing forage for sows so they can feel satisfied

Stockmanship training and Student Education
